Summarization
of Web content

Multidocument
summarization: Detect
differences

Overall goals

- Develop and implement supporting goals for summarization of informative text written in Dutch:
 - Headline type summary of a single text or text segment
 - Short textual summary composed of compressed sentences
 - Metadata that describe the rhetorical role
- Possible application domains: finance, social security, aviation, ...

Partners

- Katholieke Universiteit Leuven:
 - Coordinator
 - Machine learning and pattern classification, sentence compression, segmentation
- Rijksuniversiteit Groningen:
 - Syntactic analysis
 - Text generation
- Q-Go:
 - Corpora
 - Demonstrator
 - Webcast
